

Polygenic score accuracy retained away from training

Held-out squared correlation with true liability · phenoA · real GWAS + clumping + thresholding

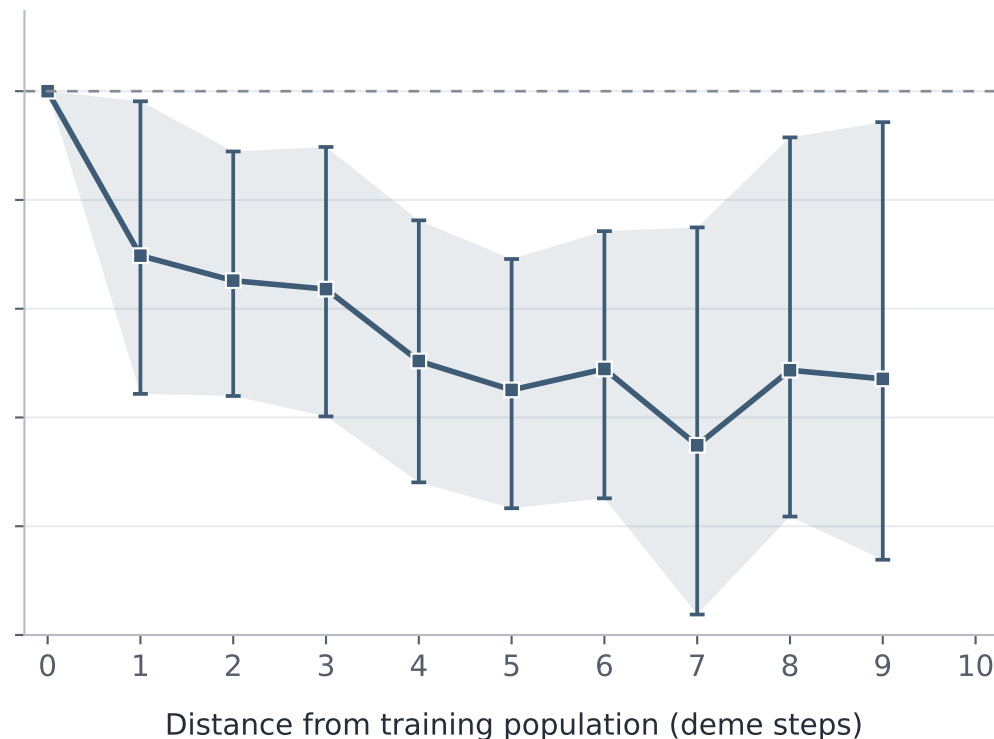

Mean across 11 recovered runs per demography; bars and shading: pointwise 95% bootstrap intervals

2-D grid

Runs: 11 11 11 11 11 11 11 8 7 3 2

1-D chain

Runs: 11 11 11 11 11 11 8 6 6 5

Entire runs are resampled together. Deme ratios are averaged within each run and distance, then across runs.

Descriptive bootstrap intervals for the recovered runs. An exact demographic prediction for this curve has not been derived.
